Fixes

Patch 8 (Build 17.0.2.134)

CPC Fixes

- 74,076: Upgraded to log4j version to 2.17.1
- 74,071: Fixed Credential caching for CPC on Mac platforms. Dependency jar oauth2-useragent-0.11.3.jar was missing from the installed package.
- 73,970: Fixed a bug in cancelling an "attach" label operation.
- 73,968: Fixed the exception "The reference view is no longer available" which is thrown when a user double clicks on the link from a CR in one view to another CR in root view.

SDK fixes

- 15,406: Fixed a performance issue with the StarTeam Rebase. There is a significant performance difference between older versions of ST and ST 17.2 for the same rebase from a label based configuration.
- 73,964: Upgraded to log4j version to 2.17.1

Patch 7 (Build 17.0.2.124)

CPC Fixes

- 73,964: Bundled the log4j version 2.17.0 to address security vulnerability CVE-2021-45105

Patch 6 (Build 17.0.2.116)

CPC Fixes

- 73,851: Disabled hardware accelerated rendering for JavaFX pages to fix the GPU usage spike from 10% to 20% when multiple projects are open.
- 73,843: Fixed an issue wherein the users are unable to open file attachments from StarTeam Client.
- 73864: Upgraded the bundled JDK version to the latest version of Temurin (jdkv8u302-b08.1)
- 73,832: Fixed an NPE which popped up after moving a folder tree in command line (Only in RHEL platform)
- 15,396: Enhanced stcmd user-resource command by adding the capability to add/remove multiple users in a single command
- 73,842: Fixed a regression which caused excessive sorting/grouping thereby slowing down the check in process for many files

Patch 5 (Build 17.0.2.110)

CPC Fixes

- 73,811: Implemented a feature to restrict process item selection to be scoped within the project during file checkins. Added a project option to support this feature.
- 73,824: Usability enhancement to select the right label while attaching a label
- 73,831: Fixed a focus loss issue while navigating folder tree using keyboard

SDK (Build Number: 17.0.2.36 - Bundled with CPC and also shipped separately)

- 73830: Fixed a compatibility issue in Jenkins Plugin due to a layout change in the latest version of Jenkins. This issue breaks the Jenkins pipeline configuration and system page. This fix in the Jenkins Plugin is distributed using SDK build.

Patch 4 (Build 17.0.2.86)

CPC Fixes

- 73,706: Fixed a regression that caused custom tools to stop loading.

Patch 3 (Build 17.0.2.74)

CPC Fixes

- 73,484 Fixed an NPE in CMD after Force Logoff during the opening of a project.

- 73,481 Fixed an NPE in command line when trying to click on "Edit HTML" button in Attachment pane of an existing attachment.
- 73,416 Fixed an issue wherein the Link tab is not displaying the expected content and Nulls are thrown in CMD when selecting the link.
- 73,476 CPC now does not create check in change packages when there are no changes.
- 73,431 Fixed an NPE in the console when Compare tab is opened

SDK (Bundled with CPC and also shipped separately)

- 15,379 Fixed a performance issue. The typical manifestation of the problem is a very high number of server calls to command GET_VIEW_PROPERTIES. The root cause of the slowdown is the high volume of MPX events originating from project and views which are not accessible by the logged in user. This fix is included in the CPC build.

GIT Client (Bundled with CPC)

- 73,444 Fixed an issue wherein Git push fails for Lightweight view with an internal error in the push dialog.

Patch 2 (Build 17.0.2.62)

- 73,442: Replaced bundled JRE for Windows version of CPC, SDK and Extensions to AdoptOpenJDK v 8u282b08

Patch 1 (Build 17.0.2.52)

- 73,381: Fixed a Checkout performance issue. Users might experience a hang when checking out a very large number of files.
